Error Message Decoder

This tool will help you research and resolve error messages for Cisco IOS Switches Software, Cisco Secure PIX Firewall Software, Firewall Service Modules Software, VPN3000, Cisco NX-OS, Aironet (VxWorks & IOS) Software, Wireless LWAPP Software & Cisco IOS XR Software. Follow the instructions to receive a description, recommended action, and related resources for your error message.

Standard error messages have the following structure :
Example: %FACILITY-SEVERITY-MNEMONIC : Message-text
Example: %SYS-2-MALLOCFAIL

Other console messages (like debugs or router crashes) are not supported. Please check the [help](#) file for more information.

In our example:

Error Message	Decoder Entry
%SYS-2-MALLOCFAIL	%SYS-2-MALLOCFAIL

Paste Error Message:
